

VINESH TIWARI

Software QA and Testing Engineer

+91-8700383146 | vineshtiwari07@gmail.com | New Delhi, India | Experience: 4 Years 9 Months |

Experienced Software QA Engineer with 4.5 years of combined manual, automation, API and database testing experience across Travel Fintech, Health & Welfare (US Benefits) and Restaurant Tech domains. Currently driving quality for the Creative Cloud Desktop Apps team through end-to-end testing, automation using Selenium WebDriver with Java and TestNG, API validation with Postman/JMeter and network traffic inspection with Charles Proxy. Proven ability to improve automation coverage, reduce defect resolution time and ensure reliable releases by leveraging SQL for backend validation, CI/CD with Jenkins and defect tracking via JIRA/Devrev.

SKILLS

- | | | |
|----------------------|----------------------|----------------------|
| • Manual Testing | • Functional Testing | • Automation Testing |
| • Selenium Webdriver | • Python | • Postman |
| • JMeter | • Charles Proxy | • Browserstack |
| • MySQL | • SQL | • JIRA |
| • Devrev | • Testng | • API Testing |

WORK EXPERIENCE

Software QA and Testing Engineer - TEKsystems

Jul 2025 - Present

- Creative Cloud Desktop Apps: Spearheaded end-to-end manual and automation testing for the Apps section, validating installation, update, uninstall, and application lifecycle flows for a global user base.
- Test Execution & Coverage: Executed comprehensive smoke, sanity, regression, and release testing across multiple deployment cycles to ensure stable product releases.
- Test Automation: Maintained and optimized test suites (30% automation / 70% manual) using Selenium WebDriver, Java, and TestNG, accelerating regression cycles.
- API & Log Analysis: Inspected backend traffic and simulated edge cases using Charles Proxy; leveraged Splunk and Claude for deep log analysis and root cause investigation, significantly reducing defect resolution time before production.

Member - Posist Technologies Restroworks

Sep 2024 - Jul 2025

- Domain Leadership: Led testing efforts in the Restaurant Tech domain across Kiosk, QR Menu, Web App, and Website Ordering systems for global clients.
- Aggregator Integrations: Conducted rigorous integration, regression, and system testing for mappings with major aggregators (Swiggy, Zomato, DoorDash, UberEats), ensuring highly accurate order processing and data synchronization.
- Defect Management: Logged and managed over 150 defects via Devrev; improved defect documentation processes which directly reduced the development team's resolution time.
- Automation Initiatives: Developed and executed foundational automation test cases for aggregator mappings and internal projects, establishing a baseline to improve overall test coverage.

Software QA Engineer 1 - SANKASH

May 2024 - Aug 2024

- Developed and maintained automated test scripts for regression testing, increasing automation coverage by **25%** and reducing manual efforts by **20%**.
- Performed cross-browser testing using BrowserStack across Chrome, Firefox and Edge.
- Created detailed Test Plans and Test Cases from business and technical requirements.
- Validated data integrity using complex SQL queries in MySQL.
- Collaborated with cross-functional teams to improve testing efficiency by **15%** and reduce defect resolution time by **30%**.

QA Analyst - Wipro HR Services LTD

Aug 2021 - Feb 2024

- Worked in the Health & Welfare / US Benefits domain executing integration, regression, smoke, sanity, system and re-testing.
- Executed automated regression tests across product releases, contributing to a **30% decrease in production issues**.
- Performed back-end testing validating database triggers, stored procedures and functions.
- Created and maintained Postman collections and environments for multiple APIs to streamline testing across environments.
- Logged and managed over **150 defects** using JIRA with detailed reproduction steps and screenshots, supporting faster resolution.
- Prepared Test Logs, Test Reports and coordinated defect resolution with development teams.

PROJECTS

Creative Cloud Desktop

13 Months

- Spearheaded the end-to-end manual and automation testing lifecycle for the Apps section of Creative Cloud Desktop, ensuring high quality and reliability.
- Utilized Charles Proxy for deep API testing and traffic interception to validate backend responses and simulate complex edge cases.
- Leveraged Splunk for log analysis to investigate complex defects, enabling rapid root cause analysis before production releases.
- Maintained automation suites using Java, Selenium WebDriver, and TestNG to accelerate regression cycles and improve release reliability.

Annual Enrollment (Wipro)

22 Months

- Derived detailed test scenarios and documented reusable test cases for the Annual Enrollment system utilized for employee benefits selection.
- Executed integration, regression, smoke, and UAT testing to ensure flawless system stability during critical high-traffic enrollment windows.
- Coordinated with cross-functional teams to mentor resources and successfully onboard new joiners, ensuring the timely delivery of all test deliverables.

EDUCATION

2021

B.Tech / B.E. | Information Technology

Maharaja Agrasen Institute of Technology,
Delhi

Marks - 71%

2014

10th

CBSE, English

Marks - 77%

EXTRA-CURRICULAR ACTIVITIES

Mentoring

Mentored new joiners at Wipro and guided team members on test practices and onboarding to improve delivery timelines.

ACHIEVEMENTS

Key contributions

Contributed to automation coverage improvements and helped reduce defect resolution time through detailed defect management and collaboration with development teams.
